Governance Maintenance & Upgrade Framework

Version v1.0.0 — Last updated 2026-08-27

---

1. Purpose

This document defines how governance documents are:

- maintained
- updated
- evolved over time

---

2. Binding Effect

During the Advisory Governance Period (formation to the Activation Date) governance outcomes are advisory (**OA §§5.8–5.9**), save for the three binding acts in **Charter §4A.2**; from the Activation Date they are binding (**OA §5.7**).

Before the Activation Date, a change under §4 requires:

1. a vote at the threshold §4 assigns it; and
2. adoption by the Transition RAC by written resolution published to the Official Venue (**OA §5.9**).

---

3. Document Hierarchy

The Company's document hierarchy is defined in **Operating Agreement §11.3** and restated constitutionally in **Charter §13**. This Framework is an operational policy and is subordinate to both.

3.1 Legal and Formation Documents

These sit outside the policy library and are not amended under §4.

Document	Amended by
Operating Agreement	OA Article XII; an Entrenched Provision only at the OA §12.2(c)/(d) thresholds (DAO Parameters §3A.4). Schedules 1–4 are maintained as the Agreement provides (OA §9.9, §11.4); doing so is not an amendment
Certificate of Formation	Filing with MIDAO / the Registrar under the DAO Act, including where OA §11.4 requires it. Not by governance proposal

Document	Amended by
BOIR	Compliance filing under OA §10.1; re-filed when the underlying facts change
Continuity Statement	Executed under OA §9.3, updated per §1.10, recorded per §9.14. Not by governance proposal
Asset Transfer Agreements and IP Schedules	Transaction documents under OA §9.4 and the **Open Source & Intellectual Property Policy §10**. Created for a specific transfer and executed with the Asset Transferor when that transfer is agreed; no standing template is maintained or ratified. An executed agreement is amendable only by agreement with the counterparty, on the terms of the instrument itself

"Formation Document" means any instrument by which the Company is formed, registered, or maintains its legal existence, and any instrument the Company executes as a legal person with a third party. A document's absence from this section does not place it outside the term.

The Charter and the documents of the ratified policy library are not Formation Documents. Incorporation by reference into a Schedule of the Operating Agreement, or recognition under **OA §11.1–§11.2**, does not convert a policy-library document into a Formation Document: the **On-Chain Identifiers & Verification Policy** is incorporated by reference in **OA Schedule 4** and remains a policy-library document, amended under §4 subject to the bespoke procedure in §3.2.

Publication. The Operating Agreement and the Certificate of Formation are published in the governance repository. The **Beneficial Owner Information Report** and the **Continuity Statement** are not, and are not required to be: the first carries the personal identifying information of each beneficial owner and is disclosable only to the persons listed in **OA §10.5**, and the second is executed in the form required by the Founding Transferor (**OA §9.3**) and recorded under **OA §9.14** subject to the confidentiality and redaction requirements applying to it. Executed **Asset Transfer Agreements** and **IP Schedules** are recorded on the same basis. Amendment of any of these follows the same route as its execution and does not require publication of its contents. Their execution and currency are verified by the independent third parties named in **Operating Agreement Schedule 5** — the BOIR under condition 2, the Continuity Statement under condition 8, and the principal transfer documentation under condition 9 — rather than by publication. No governance right or obligation in the ratified framework depends on reading them.

3.2 Bespoke Change Procedures

Where the Operating Agreement or Charter preserves a change procedure specific to a document, that procedure governs **the matter it covers**, and §4 does not apply to that matter. Every other change to the document, including any change to its text, remains an amendment under §4.

On-Chain Identifiers & Verification Policy (OA §11.4; Schedule 4):

- A change to a **recorded identifier** is not an amendment. It is made under that Policy §8, with the MIDAO notification and Certificate of Formation amendment OA §11.4 requires.
- A change to the **text** of that Policy is an amendment under §4, classified under §4.1–§4.3 in the ordinary way.

3.3 Policy Library

Amendments to the Charter require a Constitutional proposal and amendments to operational policies require a Governance Process proposal, at the thresholds in **DAO Parameters §3.2–§3.3A**, per §4.

---

4. Types of Changes

4.1 Patch Changes

- cosmetic or non-semantic
- do not affect meaning (e.g., typo corrections, formatting, cross-reference updates)

Approval:

- **Governance Process proposal** — standard threshold (≥60% YES, ≥7% quorum, ≥2% minimum affirmative support)

4.2 Minor Changes

- process improvements
- parameter adjustments
- non-structural updates to policy language

Approval:

- **Governance Process proposal** — standard threshold (≥60% YES, ≥7% quorum, ≥2% minimum affirmative support)

4.3 Major Changes

- changes to the Charter
- changes to governance structure
- changes affecting authority, rights, or the role of any governance body

Approval:

- **Constitutional proposal** — supermajority threshold (≥66% YES, ≥10% quorum, ≥3.5% minimum affirmative support)

Overlay. A Constitutional proposal is the floor, not always the whole requirement:

- An Entrenched Provision (OA §12.2(a); Charter §12.1) additionally requires the thresholds in **DAO Parameters §3A.4**.
- A change altering the Activation framework is a **Protected Matter** (**OA §9.12(e)–(g)**) and additionally requires the unanimous signing threshold in **OA §9.11**.
- **OA §12.2(b)** prohibits certain amendments absolutely during the Transition Period.

All thresholds are defined in DAO Parameters §3.2, §3.3 and §3.3A.

---

5. Amendment Process

All changes must:

- be proposed through governance
- include clear rationale
- specify change type (patch / minor / major)
- include version updates

Where §4.3's overlay applies, its notice, consent, and disclosure requirements must be satisfied before the change takes effect (**DAO Parameters §3A.4**).

---

6. Versioning

Each update must include:

- version number (format: vMAJOR.MINOR.PATCH — increment the appropriate segment per the change type in §4)
- summary of changes
- effective date

Version numbers recorded in the authoritative amendment record under Operating Agreement §12.3 follow this format.

---

7. Consistency Rules

Changes must:

- not conflict with higher-level documents
- maintain internal consistency across policies
- clearly state any dependencies

---

8. Maintenance Responsibility

- Governance & Legal Working Group maintains documents
- RAC ensures process compliance
- DAO approves all substantive changes

---

9. Emergency Amendments

Charter §12.2 governs this power; where this section differs from it, Charter §12.2 prevails.

The Operating Agreement does not provide an emergency-amendment power. The emergency-amendment power is established constitutionally by **Charter §12.2**; this section is the operational procedure giving effect to it under **Operating Agreement §11.5**, and applies **only to documents in the policy library** (the Charter and operational policies).

Where an emergency requires a temporary amendment to a policy-library document before the standard process in §5 can complete, the amendment may be adopted by **unanimous written consent of all Delegates**, subject to Governance Proposal ratification within 30 days. An amendment not ratified within 30 days is void and of no effect **from the expiry of that period**.

During the Transition Period, "all Delegates" means all seated Transition RAC members and the ratification requirement is satisfied by a recognised advisory outcome (**Charter §12.2**; **DAO Parameters §3A.3**). "Written consent" has the meaning given in the **Emergency & Safeguards Policy §19**, which governs the procedural detail and applies where an emergency action is required before a written-consent process can be completed.

An emergency amendment is subject to every limit in Charter §12.2:

1. it may amend only the Charter or an operational policy, not the Operating Agreement, the Certificate of Formation, or any other Formation Document (§3.1);
2. it may not touch an Entrenched Provision (Charter §12.1) or the Activation framework (Charter §4A);
3. it is temporary pending ratification and confers no power to make the change permanent;
4. it must be publicly disclosed on adoption;

5. if ratification fails, any action invalid under the unamended document is reported and reviewed under **Emergency & Safeguards Policy §10**, and any treasury disbursement so made is recoverable unless separately ratified; and
6. before ratification it does not authorise **seating a person in a role**, a change to the **treasury signer set or its thresholds**, or a transfer or exercise of the **Master Badge, Owner Badge, or Governance Operations function**.

---

10. Transparency

All changes must be:

- publicly visible
- clearly documented
- traceable over time

---

11. Amendments

Changes to this Framework follow the process defined within it, subject to:

- **Hierarchy.** Established by **OA §11.3**, an Entrenched Provision (**OA §12.2(a)(iii)**). No amendment to this Framework can alter it; any provision purporting to do so is void to that extent.
- **Thresholds.** Values are carried in the **DAO Parameters Registry**; changing one amends that Registry, not this Framework. The floors in **Charter §12.1 items 2 and 4** cannot be reduced by any proposal.
- **Otherwise.** A change to §4, §5, or §9 is a Major Change (§4.3).
