Governance Maintenance & Upgrade Framework

---

1. Purpose

This document defines how governance documents are:

- maintained
- updated
- evolved over time

---

3. Document Hierarchy

The Company's document hierarchy is defined in **Operating Agreement §11.3** and restated constitutionally in **Charter §13**. This Framework is an operational policy and is subordinate to both.

3.1 Legal Formation Documents

The Formation Documents (Operating Agreement, Certificate of Formation, BOIR Template, Asset Transfer Agreement, IP Schedule, and Continuity Statement) are legal instruments filed with the Registered Agent. They may be amended only by the process specified in **Operating Agreement Article XII**:

- **General rule (OA §12.1).** The Operating Agreement is amended only in accordance with the governance process validly applicable at the time — during the Transition Period subject to the transition thresholds and protected-matter rules, and following the Activation Date subject to the long-term governance framework.
- **Entrenched Provisions (OA §12.2).** Provisions designated as Entrenched Provisions may be amended only at the elevated thresholds in OA §12.2(c) (during the Transition Period) or §12.2(d) (following the Activation Date), as carried in **DAO Parameters §3A.4**. Certain amendments are prohibited absolutely during the Transition Period (OA §12.2(b)).
- **Charter and operational policies.** Amendments to the Charter require a Constitutional proposal and amendments to operational policies require a Governance Process proposal, at the thresholds in **DAO Parameters §3.2–§3.3**, per §4 below.
- **Other Formation Documents** (Certificate of Formation, BOIR Template, Asset Transfer Agreement, IP Schedule, Continuity Statement) are amended as required by applicable law and the Operating Agreement, and re-filed with the Registered Agent.

---

4. Types of Changes

4.1 Patch Changes

- cosmetic or non-semantic
- do not affect meaning (e.g., typo corrections, formatting, cross-reference updates)

Approval:

- **Governance Process proposal** — standard threshold (≥60% YES, ≥7% quorum)

4.2 Minor Changes

- process improvements
- parameter adjustments
- non-structural updates to policy language

Approval:

- **Governance Process proposal** — standard threshold (≥60% YES, ≥7% quorum)

4.3 Major Changes

- changes to the Charter
- changes to governance structure
- changes affecting authority, rights, or the role of any governance body

Approval:

- **Constitutional proposal** — supermajority threshold (≥66% YES, ≥10% quorum)

All thresholds are defined in DAO Parameters §3.2 and §3.3.

---

5. Amendment Process

All changes must:

- be proposed through governance
- include clear rationale
- specify change type (patch / minor / major)
- include version updates

6. Versioning

Each update must include:

- version number (format: vMAJOR.MINOR.PATCH — increment the appropriate segment per the change type in §4)
- summary of changes
- effective date

Version numbers recorded in the authoritative amendment record under Operating Agreement §12.3 follow this format.

---

7. Consistency Rules

Changes must:

- not conflict with higher-level documents
- maintain internal consistency across policies
- clearly state any dependencies

---

8. Maintenance Responsibility

- Governance & Legal Working Group maintains documents
- RAC ensures process compliance
- DAO approves all substantive changes

---

9. Emergency Amendments

The Operating Agreement does not provide an emergency-amendment power. The emergency-amendment power is established constitutionally by **Charter §12.2**; this section is the operational procedure giving effect to it under **Operating Agreement §11.5**, and applies **only to documents in the policy library** (the Charter and operational policies), not to the Operating Agreement, the Certificate of Formation, or any other Formation Document, and never to an Entrenched Provision.

Where an emergency requires a temporary amendment to a policy-library document before the standard process in §5 can complete, the amendment may be adopted by **unanimous written consent of all Delegates**, subject to Governance Proposal ratification within 30 days. An amendment not ratified within 30 days is void and of no effect. Actions taken under an unratified amendment are subject to the clawback rule in **Charter §12.2 item 5**: any action that would not have been valid under the unamended document must be reported and reviewed under the **Emergency & Safeguards Policy §10**, and any treasury disbursement so made is recoverable unless

separately ratified by Governance Proposal. During the Transition Period, “all Delegates” means all seated Transition RAC members and the ratification requirement is satisfied by a recognised advisory outcome (**Charter §12.2**; **DAO Parameters §3A.3**). “Written consent” has the meaning given in the **Emergency & Safeguards Policy**, which governs the procedural detail and applies where an emergency action is required before a written-consent process can be completed. An emergency amendment may not weaken, reduce, or remove any entrenched provision (Charter §12.1) or alter the Activation framework (Charter §4A).

---

10. Transparency

All changes must be:

- publicly visible
- clearly documented
- traceable over time

---

11. Amendments

Changes to this framework follow the same process defined within it. A change that affects amendment thresholds or the document hierarchy is a Major Change (§4.3) and requires a Constitutional proposal.
